About Me

Creative, hard working, speedy, accurate and good-humoured editor based in North West England but happy and willing to work anywhere. I have accommodation always available for when I have jobs in London.

I am told that my big strengths are attention to detail, in content and technical issues. I have a sharp storytelling ability, an editorial / journalistic mind with quick, sound judgement, stemming from a long career in the industry with many hours of controversial and entertaining programming behind me. I understand compliance issues and potential legal pitfalls, but also have a breadth of experience across many technical situations to know how to get the best out of content, people and resources. About Me
contd.

I have also been told that I have a rare ability to turn my talents to any genre. I'm as equally at home stitching *You've Been Framed!* as I am constructing hard-hitting docos on *Tonight* or *Crimefighters*, crafting polemics and reasoned arguments on *Don't Get Me Started* and *Investigative Reports*, or splicing fast-cut promos and montages in the *X Factor* style.

So you want whooshes? *Yes, I do those.*

Whip Pans? *Yes.*

Speed Ramps? *Yes.*

Glow-Throughs/white flashes? *Stop it now, but yes.*

Don't want any of these, but just want a good solid watchable programme? *Of course!*

Tight deadlines? Up against transmission? *Love it, especially if you know what you want...!*

Need your editor to understand effects and graphics, as well as the traditional editor's domain? *I'm your man!*

Corporates? *Yes, those too!*

20 years experience on Avid, Apple Certified Pro on Final Cut Pro, Motion and Soundtrack Pro and Adobe-trained on Premiere Pro CC 2014 and After Effects CC 2014, so I officially do know what I'm doing!

I own my own kit - either **Avid Symphony 8.5**, **Premiere Pro CC 2017**, and **Final Cut Pro 7** (or X if you really want, but you won't want...) - all running on the latest MacBook Pro with Retina display or 27" 5K Retina iMac systems. I have a full edit suite set up at home if needed.

I also have **15TB of superfast Promise Pegasus2 Thunderbolt RAIDed** storage (capable of handling full HD and higher resolutions, whilst offering built-in redundancy of media storage) and a **Blackmagic Ultra Studio 3D** unit which allows Thunderbolt connection to and from my Macs, to and from every piece of equipment from monitors to HDMI connections to SD- and HD-SDI decks and transmission systems, meaning I can connect to everything you've got and need and more, all on a mobile system.

I bring my expertise to the edit, but also a wealth of technical gubbins and tons of extras - I've invested in literally thousands of royalty-free graphics, wipes, flashes, moving backgrounds, fonts, royalty-free music, and three HD royalty-free stock footage libraries. Yes - beautifully shot in slo-mo for great speed ramps, GVs of skies, seas etc etc - all for no extra charge.

Anything else? Oh yes, a 90,000+ strong sound effects library, many in Dolby 5.1 surround sound.

And full, legal versions of all my software - Avid Symphony 8.8 with Magic Bullet Looks and BCC 8, Adobe Creative Cloud 2017 including Premiere Pro, After Effects, Photoshop and Illustrator, Final Cut Studio 3 and Final Cut Pro X, with full Sapphire Effects for FCP/Premiere/After Effects, and Magic Bullet Looks, plus Microsoft Office for Mac.

I'm also internet and new media savvy - if you need versions of your show for online, mobile or DVD distribution, I have the skills, know-how and equipment to provide those, from a clip onto YouTube to a fully-authored sell-through DVD or Blu-Ray.
